

# INNOVATIVE SKIN TECHNOLOGY

Lucrèce, produced by Physicians' Aesthetic Research, Inc. is a scientifically tested program of skin care dedicated to technology and research, ensuring that our products contain the most advanced ingredients and formulas in the industry. More specifically, the focus of the line is on Anti-Aging, and the promotion and maintenance of healthy skin.

As Peptide technology continues to revolutionize skin care, we're taking advantages of every opportunity to ensure our clients have access to the most advanced, result oriented anti-aging products available. Originally, Peptides (mostly found in the ingredients Argireline & Matrixyl) became a tremendous success as studies continued to show that they were not only more effective for fighting wrinkles and stimulating the skin's natural collagen, but that the peptides exposed the skin to far less trauma than retinols or glycolic acid. It's an exciting time for our line, and skin care in general as chemists continue to improve and fine-tune this incredible technology.

## A&M RECOVERY SYSTEM

### A & M Facial Recovery Therapy

A highly advanced anti-aging treatment that applies the most tried and true peptides and delivery systems; Argireline & Matrixyl. It works the deeper layers of the skin to provide diminished wrinkle depth, as well as an increase in skin elasticity and firmness. These results are typically realized after 3-4 weeks of consistent usage. We recommend using this facial therapy every evening (for anti-aging regimens), and following with the Vitamin A facial cream + III. Avoid the eye area when applying.

### A & M Eye Recovery Therapy

A highly advanced anti-aging treatment that applies the most tried and true peptides and delivery systems; Argireline & Matrixyl to the highly wrinkle prone and sensitive eye area. It works the deeper layers of the skin to provide diminished wrinkle depth, as well as an increase in skin elasticity and firmness. These results are typically realized after 3-4 weeks of consistent usage. We recommend using this eye therapy every evening before the A & M Facial recovery and the Vitamin A facial cream + III.

# ANTI-AGING PEPTIDES

## Nano-Peptide B5 Complex

Providing sufficient hydration is the most essential way to keep our skin healthy feeling and healthy looking. While many of our products assist in hydrating the skin, we felt that we should dedicate a product with hydration as the main focus. Fortified with Hyaluronic (30%) and Pantothenic acid, the Nano-Peptide B5 is that product; providing an especially deep and complete hydration. And because of the presence of peptides and the use of nanotechnology, it also assists in tightening and firming the skin while allowing for maximum absorption and effectiveness. These combinations have helped make the Nano-Peptide B5 our most universal and sought after product. Apply the Nano-Peptide B5 Complex directly after cleansing, and for anti-aging regimens, we recommend following with our Collagen Peptide Complex.

## Peptide Resurfacing Serum

This product was designed to prepare and increase the skins receptiveness to the Lucrece Professional Peptide Peel, but because it boasts our strongest concentration of Peptides [25% Argireline, 15% Matrixyl, 10% Biopeptide CL, 5% Rigin, 5% Eyeliss], it is becoming a very much in demand retail product. Composed of 55% Peptides, Green Tea Extract, Echinacea Extract, Meadowsweet, Amino Acids, Imperata Cylindrica, and other cutting edge ingredients, it promotes healing and repair response, increases skin thickness by stimulating the development of new collagen I & III, and evens the texture of the skin. A must have for those who are intent on building the most effective anti-aging regimen.

## Collagen Peptide Complex

The Collagen Peptide Complex builds off of our Collagen Copper Activating Complex, and adds our most complete and advanced combination of peptides to date. It will help keep the skin looking its youngest and most alive, as it works to firm, and add elasticity & texture to the skin, further defying the aging process. This product is best used directly after the Nano-Peptide B5 Complex, and before a moisturizer.

## Antibacterial Facial Cleanser

This cleanser is the first step in optimal skin care and is specifically designed for normal to oily skin types. It prepares the skin by removing excess oil, make-up, and dirt that can limit the action of glycolic acid, clarifying agents, and anti-oxidants, thereby enhancing penetration of these ingredients. This cleanser is gentle enough to be used on the delicate eye area, and effective enough to ensure thorough cleansing. Our Creamy Cleanser and Rosacea Creamy Cleanser are alternative cleansers for those with dry skin, or those who suffer from rosacea or extremely sensitive skin.

## Creamy Facial Cleanser

A gentle cleansing formula specifically for those with dry skin, the Creamy Facial Cleanser contains natural extracts such as orange blossom, chamomile, lavender, cucumber, and rosebud that help to heal and moisturize vitamin depleted skin.

## Rosacea Creamy Cleanser

Antioxidant & anti-inflammatory ingredients combine to soothe and help heal the skin of those who suffer from Rosacea or extremely sensitive skin. The ingredients found in our Rosacea products are so specialized and effective that many of our best success stories come from those who use our Rosacea line for the first time.

## Hydrating Firming Toner

This product firms the skin with L-Ascorbic Acid and Anti-wrinkle, Skin Tightening Complex, and hydrates with Hyaluronic Acid, which holds connective tissues together allowing for increased hydration and moisture retention in the skin. The Hydrating Firming Toner is great to use after cleansing because it removes any residue that may be left from cleansers, but it also can be applied over make-up to give your skin more of a healthy, natural glow.

## Reparer Serum

The Reparer Serum is formulated to promote healing and repair of dry or irritated skin affected by environmental free radicals. It also contains liposome, which encapsulates and slowly time releases beneficial Vitamin A, C, E and Hyaluronic Acid into the afflicted skin. The Reparer Serum is recommended for temporarily or chronically dehydrated skin.

# MOISTURE - MAINTAIN

## Regenerative Facial Cream + III

Designed for normal skin types, the Regenerative Facial Cream + III is a highly effective Glycolic Acid based moisturizing cream that restores texture and clarity and gives radiance to dull, sun and aged-damaged skin.

## Intensive Clarifying Facial Cream + III

The Intensive Clarifying Facial Cream + III addresses the multiple problems of sun and age damaged skin. This formulation features Glycolic Acid, which exfoliates the outer layer of the skin and minimizes fine lines to restore texture. Kojic Acid, Licorice, and Hydroquinone work specifically to even out discoloration and hyper-pigmentation, providing a more even skin tone. Also available without Hydroquinone.

## Anti-Wrinkle Facial Cream

The Anti-Wrinkle Facial Cream formula boasts a strong combination of peptides, a mild skin lightener, and a host of natural extracts that make it an especially refined and advanced moisturizer. Avoid the eye area when applying. The Anti-Wrinkle Eye Cream is specifically formulated to minimize fine lines & wrinkles, and for lightening dark circles around the eye area.

## Rosacea Moisturizing Facial Cream

Providing a soothing, anti-inflammatory effect, the Rosacea Moisturizing Facial Cream calms irritation and reduces redness quickly and effectively. The ingredients found in this product, such as Dimethicone, Green Tea Extract, Emu Oil, Emblica, & Zinc Oxide are highly specialized. This moisturizing cream does provide a natural sun protector in Zinc Oxide, but it is highly recommended to follow use of this product with the Lucrece Clear Zinc Solar Protection, SPF 30.

## Sensitive Skin Facial Cream + III

The Sensitive Skin Facial Cream + III is an ideal lightweight moisturizing cream for those with dry, sensitive, oily, or youthful skin, delicate skin. It contains a lighter blend of Glycolic Acid and clarifying agents especially designed for sensitive skin to achieve a smoother and more even complexion.

# PROTECT - PRESERVE

## Clear Zinc Solar Protection

This physical and completely natural sunblock made with nano-particles of Zinc Oxide (which blocks more UVA & UVB Rays than any other single ingredient), provides more effective sun protection, less side effects, and significantly less skin irritation than traditional sunblocks.

## Clear Zinc Solar Protection (Tinted)

This physical and completely natural sunblock made with nano-particles of Zinc Oxide (which blocks more UVA & UVB Rays than any other single ingredient), provides more effective sun protection, less side effects, and significantly less skin irritation than traditional (chemical) sunblocks. The Clear Zinc Solar Protection (Tinted) has been particularly popular because it adds color to the skin, adapting to an individual's natural skin tone, and providing a perfect

## Vitamin A Facial Cream + III

With C-ester & DMAE in addition to our three main anti-oxidants, our Vitamin A Facial Cream + III presents a powerful combination of ingredients for firming and tightening the skin. Using anti-wrinkle Retinol, which is the purest form of Vitamin A, this product works deep within the skin's layers where wrinkles develop. Use this cream at night only, as Vitamin A is highly sensitive to sunlight. It's also recommended that you use sun protection the following day after use of this product.

## Vitamin A + AHA Serum

This product is designed especially for oily, acne-prone skin. This Retinol gel formulation works within the skin layers relieving the skin of fine lines and reducing the size of pores for a more youthful appearance. Use this product at night only, as Vitamin A is highly sensitive to sunlight. It's also recommended that you use sun protection the following day after use of this product.

## AHA Gel (20%)

The AHA Gel (20%) is an ideal light peel, used to enhance the quality of the skin by lightening pigmentation, healing blemishes, refining fine lines and wrinkles, while improving the overall skin tone. After several treatments, your skin will develop a renewed freshness.

# RESTORE - REGENERATE

## Vitamin C Serum

Vitamin C has been shown to be a key component in the protection of collagen fibers. This unique concentration of Vitamin C will help stimulate cells to produce collagen, and tighten the dermis layer.

## Collagen Copper Activating Complex

Collagen is often found to be the most powerful product for reducing signs of aging in a skin care routine. This is due to the deeply penetrating active ingredients which stimulate the skins natural collagen synthesis, occurring within the cells of the skin. This process promotes cell re-growth, increasing density and elasticity, which leaves the skin more flexible and firm. The Collagen Copper Activating Complex is water soluble, and derives from natural plant extracts.

## Non-Abrasive Exfoliating Cream

Designed for weekly use to effectively remove the outermost skin layer, the gentle, non-abrasive action eliminates dead skin cells, loosens black-heads and other debris to reveal a smoother, more refined skin texture with improved clarity.

## Eye Contour Cream

This light and soothing eye cream is specially formulated to reduce the appearance of dark circles and puffiness under the eyes. It defends, nourishes, and stimulates skin at the cellular level.

## Lip Plumping Revitalizer

A lip treatment designed to do two things: Increase the volume of your lips, and reduce the fine lines & wrinkles around the lip area. It effectively penetrates the skin and attacks free radicals, providing repair at a cellular level.

## REGIMENS

---

- **Acne, Oily Skin Regimen**
  - **Anti-Aging Regimen**
  - **Normal to Dry Regimen**
  - **Photo Aging Regimen**
  - **Rosacea Regimen**
  - **Sensitive Skin Regimen**
- 

### **Acne , Oily Skin Regimens**

#### ***Daily Regimens & Treatment Suggestions***

##### **Morning Regimen:**

1. Acne Cleanser (w/ Salicylic Acid)
2. Hydrating Firming Toner
3. Nano Peptide B-5 Complex
4. Eye Contour Cream
5. Acne Clarifying Cream
6. Clear Zinc Solar Protection

##### **Evening Regimen:**

1. Acne Cleanser (w/ Salicylic Acid)
2. Nano Peptide B-5 Complex
3. Eye Contour Cream
4. Vitamin A + AHA Serum (*Apply only on affected areas. Apply Solar Protection the following morning after every use.*)
5. Acne Clarifying Cream

##### **Treatments**

1. Salicylic Acid Peel
  2. Acne Oxidizing Mask (*Recommended twice a week*)
  3. Pumpkin Enzyme Peel
  4. Enzyme Lifting Mask
  5. Oily Skin Mask
- 

### **Anti-aging Regimens**

#### ***Daily Regimens & Treatment Suggestions***

### **Morning Regimen:**

1. Antibacterial Facial Cleanser or Creamy Facial Cleanser
2. Nano Peptide B-5 Complex
3. Collagen Peptide Complex
4. Anti-Wrinkle Eye Cream
5. Intensive Clarifying or Anti-Wrinkle Facial Cream
6. Clear Zinc Solar Protection

### **Evening Regimen:**

1. Cleanse
2. Nano Peptide B-5 Complex
3. A&M Recovery System
4. Vitamin A Cream *(Only apply this product as the last step to a night regimen. Apply Solar Protection the following morning after every use.)*

### **Treatments**

1. Professional Peptide Peel used with the Peptide Resurfacing Serum
2. Glycolic Acid Peels
3. Pumpkin Enzyme Peel w/ Glycolic, Salicylic, & Lactic Acid
4. Enzyme Lifting Mask
5. Anti-Aging Mask, or Collagen Mask
6. Non-Abrasive Exfoliating Cream *(Recommended once a week)*

---

### **Normal to Dry Skin Regimens**

#### ***Daily Regimens & Treatment Suggestions***

### **Morning Regimen:**

1. Antibacterial Facial Cleanser
2. Hydrating Firming Toner
3. Nano Peptide B-5 Complex
